

NDRI STATEMENT ON THE MARCH FOR SCIENCE

NDRI has the privilege of serving as a partner to scientists across the world dedicated to advancing understanding of disease and the discovery of treatments and cures. The scientists we serve – our research partners – toil for answers built on evidence devoid of contamination of any kind.

Disease and disability have no political affiliation. The suffering endured by patients and the pain and heart break shared by their loved ones is experienced no differently by Democrats, Republicans or Independents.

NDRI proudly supports the March for Science activities that will take place in locations across our nation and the world on Saturday, April 22, 2017. We encourage all individuals who have a vested interest in a life free of disease and disability to make certain that those involved in scientific policy development and research funding decisions understand that our future depends on science.

About NDRI

The [National Disease Research Interchange \(NDRI\)](http://ndriresource.org) is the nation's leading source of human tissues, cells and organs for scientific research. As a not-for-profit 501 (c)(3) organization founded in 1980, NDRI's mission is to provide human biospecimens to advance biomedical/bioscience research and development worldwide. NDRI is funded in part by the National Institutes of Health, public and private foundations and organizations, pharmaceutical and biotechnology corporations.
